Office Action Summary

Application No.

09/836,014

Applicant(s)

VEILLEUX ET AL.

Examiner

Yvonne M. Horton

Art Unit

3635

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-14 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-14 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-8 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent #867,963 to HERSHEY in view of US Patent #4,156,995 to ZUSMAN. Regarding claims 1 and 14, HERSHEY discloses the claimed invention a structural wooden joist (20) comprising an elongated lower/first chord (24) each in substantially parallel horizontal planes, an elongated upper/second chord (22) in a spaced apart generally parallel opposed relation to the lower chord (figure 7), an openwork web structure joining the chords, the web structure comprising a series of connector members (at 28) formed of inclined branches (28 and 28A) consisting of at least two, column 3, lines 7-11, rectangular planks having opposing side faces/first and third ends and opposing edges/second and fourth ends and are adhesively secured to the lower and upper chords (column 4, lines 21-26) such that the planks define a plane along parallel to the length of each plank at an angle that is not perpendicular to the upper or lower chords (it is apparent that the planks/diagonal 28 extend at an angle of at least 45 degrees or less), each inclined branch of the connector members being adhesively joined to one another (column 4, lines 38-44), the connector members forming V-shaped structural elements (28, 28A and 28 and 28B - figure 1) with a single connection to the lower chord such that each connector member (28, 28A/B) is connected by one gusset individually on each side of vertical webs similar to (102), see figure 10; and two

Art Unit: 3635

connections to the upper chord (see attached figure 1), the structural elements defining a series of triangular openings in the web structure (figure 7). Although HERSHEY details that his upper and lower chords are adhesively joined, he is silent with regards to how his connector members are joined. ZUSMAN teaches that it is known in the art to adhesively secure two connector members (17) along the ends. Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to adhesively secure a double connector by the ends, as taught by ZUSMAN, in order to further strengthen the structure. In reference to claim 2, each of the opposite ends of the web structure displays a laminated panel (30A, 34A/B, 50) the panels are a series of vertical planks having upper and lower sides joined to upper and lower chords (22, 24). Regarding claim 3, each of the connector members at the opposite end of the web structure is adhesively joined to a chord member and to an innermost plank (30A, 30B) of the laminated panel (34A,34B,50). In reference to claim 4, the connector members of the web structure have upper and lower edges secured to the chords by finger joints (column 4, lines 23-26). Regarding claim 5, the planks (74) of the connector member of the laminated panels are glued edgewise to one another (column 7, lines 4-9). In reference to claim 6, the web structure further includes a central region (CR) free of connector members, see below. Regarding claim 7, the laminated panels

Claims 9-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent #5,867,963 to HERSHEY in view of US Patent #4,156,995 to ZUSMAN. HERSHEY discloses the claimed invention as stated above in claim 1, except for the planks are made of kiln dry wood, the fibers of the planks extend in the longitudinal direction, and each connector member extends obliquely at about 350 and 420 relative to the chords for a joist having a height of about 9.25 and 1 1.25 inches. Regarding claim 9, in apparatus claims, the method of drying the wood is not germane to the issue of patentability of the device itself. Hence, the process of kiln drying the wood has not been given patentable consideration. In reference to claim 10, the wood of HERSHEY is selected from the group including fir, spruce and pine (column 4; lines 13-15). Regarding claim 11, it would have been obvious to one having ordinary skill in the art at

Art Unit: 3635

the time the invention was made to extend the fibers of the planks in the longitudinal direction as the 2x4 extends within the longitudinal direction. In reference to claims 12 and 13, it, too, would have been an obvious to one having ordinary skill in the art at the time the invention was made to select a specific degree to extend the connector members and to select a specific joist height suitable for the use intended as a matter of design choice. For instance, if the joist were being used to form tracks on a roller coaster, perhaps the height would be much larger than the height used for the joist in a residential home.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the newly revised ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yvonne M. Horton whose telephone number is (571) 272-6845. The examiner can normally be reached on 6:30 am - 3:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Naoko Slack can be reached on (571) 272-6848. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
